     If yes, separate applications must be filed by all customers applying for the WA-12 water rate.

     Please specify service addresses of other parcels_____

By signing below I certify that the information provided above is accurate and I acknowledge that RPU will determine compliance. If I am an existing Water Rate Schedule WA-3 or WA-9 customer and do not meet the Qualifying Criteria set forth in Water Rate Schedule WA-12, I understand that I have six months to reestablish compliance with the Qualifying Criteria in order to continue receiving a monthly Agricultural Water Allocation. I authorize RPU staff to verify the information to establish eligibility for Water Rate Schedule WA-12, and the monthly Agricultural Water Allocation to qualifying crops, through a physical, on-site inspection of my property. I understand that failure to allow such an inspection will disqualify my service address from qualifying for Water Rate schedule WA-12. If approved for service under this rate, I agree to comply with all terms and conditions of Water Rate Schedule WA-12. Water Rate Schedule WA-12 is found at the City's website at https://www.riversideca.gov/utilities/residents/rates-water.asp

Signature: _____   Date: _____

__ Applicant must attach parcel map and aerial photo with planted areas indicated on both __**__**

Attachment 4

Using the County of Riverside GIS portal

To print a map:
Go to https://gis.rivcoit.org/ , click on "Map Gallery". In the "Government" section scroll until you see "Treasurer-Tax Collector" and click "View App", enter your Riverside property address in the search field at the top right of the map viewer and click the magnifying glass icon, the map will zoom to your parcel. Center your parcel in the viewer, click "Print" at the top of the map viewer and select either landscape or portrait PDF, click "Printout" once it appears, the map printout will load on the screen, click on the printer icon on the map, select your printer and hit print. To print the same map with an aerial image select "Imagery" under the "Basemap" icon at the top of the viewer and repeat the printing steps. Indicate the planted areas on both printouts with ink that will stand out.

To measure your planted areas:
While your parcel is centered within the viewer, click the "Measure" button at the top of the viewer, click the "Area" icon in the "Measure" pop-up box, use the tool to measure the planted area on your parcel, or to measure the entire parcel size. Make sure to select "Acres" as your measurement result. If you make a mistake and need to start measuring again, just click the measure tool icon to reset the tool. To turn off the Measure tool, click the Measure button at the top of the map viewer next to the search field.

Using Google Maps

To print a map:
Go to https://www.google.com/maps. Type your Riverside address into the search field, the map will zoom to your parcel. Zoom the viewer such that your entire parcel is in the view. Toggle between Map or Satellite imagery for the desired print. Click on the Menu icon to the left of the address search field. Select "Print" and click the blue Print button in the upper right corner of the viewer. Select your desired printer and hit Print. Repeat for any other desired maps. Indicate the planted areas on both printouts with ink that will stand out.

To measure your planted areas:
Once you are viewing your property, right click and select "Measure Distance", a starting point will appear on the map. Left click around the planted areas to drop points around the planted areas. Once you approach the beginning starting point, left click on the starting point to connect the area boundary. The total area in square feet will be displayed in the "Measure Distance" box. Divide that square footage by 43,560 to obtain the approximate acreage of the planted area.

Contact Riverside Public Utilities One Stop Shop at 951-826-5285 with any questions.
