

LESS WATER MORE COLOR

FREE LANDSCAPE TRAINING WORKSHOP SERIES

Join us for a series of free landscape training classes at the Janet Goeske Center.

October 27, 2018

**Soil/Plant/Water Relationships –
Don't Get Burned**

Learn about the different types of soil textures and structures and how they affect plant growth and fruiting. The role of water in plant growth and how different types of fruiting, flowering and landscape plants use water.

December 15, 2018

Irrigation Timers and How to
Program Them Before They
Program You

Learn how to program and use most timers and compare digital and analog, hose timers and troubleshoot programming problems and how to determine how long to water and when.

February 9, 2019

Irrigation Troubleshooting and
Maintenance – The Basics

Check and fix all types of irrigation systems such as drip, micro, spray, rotor, impact and hand hose. Adjust head arc, diameter, flow, and pressure. Learn how to fix basic head and riser leaks and breaks.

April 20, 2019

**Converting Traditional Irrigation
to Drip/Micro** in Three Easy Steps

Learn how to convert a basic spray or impact irrigation system to drip or micro for watering a new, low water or drought tolerant landscape.

June 15, 2019

Ditch Your Lawn – Using **Native,
Low Water Use** and **Succulent
Plants** in Place of Turf

Learn how to remove and replace your lawn and install plants that use up to 50% less water or more. See different types of landscape designs and learn how to design your own water saving back or front yard.

Workshops are scheduled from 9:30 - 11:30 AM
